Ranzani Africa
Salt & Pepper Grinders

Ranzani Africa Salt & Pepper Grinders

FEATURES

1) Italian style

Italian design is all about beauty and appreciating 'la dolce vita'.

When you hold a Ranzani Africa Salt or Pepper Grinder, it feels as if made to fit into your hand. It is also very light and thus does not put so much strain on your wrist. According to Christian Ranzani's design principle 'form follows function', practicality comes first.

2) African originality

African culture is known for its vibrancy, patterns and rhythm.

A born and bred Capetonian, Christian Ranzani incorporates African creativity into his products. Ranzani Africa Salt & Pepper Grinders represent African design in a playful personification. This couple brings colour to your dinner table!

3) High quality

Mechanism: The ceramic grinder mechanism is imported from Denmark (www.crushgrind.com). Ceramic grinders don't wear off, so they last longer and have a precise gradient to adjust the coarseness exactly how you like it.

Wood: The locally sourced white wood is a compact light wood that doesn't absorb liquids and thus is hygienic for the kitchen. It is strong, lasts long and has excellent stability.

Paint: Acrylic paint is used in modern art to create paintings that last. Once dry it forms a protective coat that is water, oil and dirt resistant. In addition, a double high gloss glazing gives a nice finish that makes the product chip resistant.

4) Hand-crafted

Ranzani Africa Salt & Pepper Grinders are produced locally in South Africa. Woodturning is a dying craft. Each grinder is hand-turned and hand-painted, empowering local businesses.

5) Sustainable

The wood is sourced from a sustainable forest according to FSC (Forest Stewardship Council: www.fsc.org) standards.
