Product Overview

Ranzani Trading Design

Christian Ranzani founded Ranzani Trading Design upon his return to Cape Town after 10 years abroad:

“Having worked with British design icons such as SCP (www.scp.co.uk), Concrete Blond (www.concrete-blond.com) and MFI (www.mfi.co.uk) I was eager to start my own design agency. What better place to design than Cape Town?

“Back in London I was mainly designing furniture, here in Cape Town I moved into interior design. With the modern sleek styles I felt a dash of colour or authentic ruggedness could lighten up the minimalistic look.

“Ranzani Trading Design combines all my design experience, from industrial to product design. So while I design a whole furniture range, I can also produce the accessories that go with it.”

Christian Ranzani

Christian Ranzani's trade is metal work, having served an apprenticeship as a fitter and turner in Cape Town. Studying Product Design in London turned his career from the workshop to the desktop.

Reconnecting with his Italian side of the family in Milan, Christian Ranzani learnt to appreciate the design of even the simplest every day products such as the iconic moka (http://en.wikipedia.org/wiki/Moka_pot).

Working for established design firm SCP (Sheridan Coakley Products) in London's trendy East End gave him great insight in the creative process of developing and marketing products.

His design agency Ranzani Trading Design enables him to do just that but with an African flair. Cape Town has an eclectic mix of cultures that inspire with their creativity and vibrancy. It is part of Ranzani Trading Design's mission to help local SMMEs and communities to turn their creativity into profitable business.

“I would define my greatest design influences coming from Alessi, for its playful adoption of practical solutions and Muji, for its simplicity in purest form making it affordable to everyone.” sums up Christian Ranzani.
